

Solutions that **WORK**

***STREATOR
DEPENDABLE***
MANUFACTURING

To attract and retain a
loyal group of customers by

OUR MISSION

offering a unique
combination of
unequaled engineering and
product expertise, quality
material handling products,
outstanding delivery and
support, and fair pricing.

OUR COMPANY

For over 55 years, we have served customers all across the US with their material handling needs, and with over 250,000 sq. ft. of manufacturing capacity and close ties with nearby subsidiaries, we're positioned to deliver products when you need them.

Our **knowledgeable sales consultants** have years of hands-on experience in the material handling industry and will work closely with you to help design the most productive and cost-effective solutions for your specific operation. We'll prepare accurate estimates based on drawings you submit, or our engineers will translate your ideas into detailed product drawings, complete with dunnage, cylinders, casters, and other components.

Our **extensive product database** and our commitment to AutoCAD technology allow us to easily "customize" one of our existing, proven designs to offer you a product that will precisely fit your needs, while keeping engineering design time to a minimum.

Throughout the manufacturing process, our use of **modern CNC equipment** and highly trained employees ensures the highest standards of accuracy and consistency are met. For over a decade, we've led the industry with laser-based manufacturing systems that help provide accuracy, economy, versatility, and consistent quality control.

Our finishing department features a fully automated **powder coating system** that provides extremely durable and attractive finishes, plus the fast curing time allows same-day shipping of products to speed up delivery times.

We're continually reviewing all of our procedures and upgrading our facilities to provide you with the most advanced and economical manufacturing service possible.

Manufacturers large and small recognize the significant long-term savings in utilizing

OUR CUSTOMERS

material handling products tailor-made to their specific operation. That's why

many of America's top producers look to Streater Dependable for innovative solutions to their material handling needs to stay competitive in today's global markets.

Industries We Serve:

- *Manufacturers of Primary and Fabricated Metal Products*
- *Tire and Rubber Producers*
- *Industrial Machinery Producers*
- *Electrical Equipment Manufacturers*
- *Automotive and Aerospace Producers*
- *Heavy Equipment Manufacturers*

OUR PRODUCTS

Innovative solutions to your material handling needs.

Containers & Bins Pages 4-7

Pallets & Skids Page 11

Containers & Bins

Steel, stainless, aluminum, stackable, knockdown ... whatever the requirement. Each custom made container is precisely engineered using just the proper material and weld configuration needed for your specific manufacturing operation.

Bin 001 — Galvanized mini-load bin for AS/RS

Bin 002 — Large drop-bottom box (60" x 60" x 60")

Bin 003 — Large scrap container for aluminum producer

Bin 004 — Large stackable wire mesh container (4-way forklift entry)

Bin 005 — Collapsible stacking container

Bin 006 — Stackable corrugated steel container on skid base

Bin 007 — Hopper front containers

Bin 008 — Corrugated steel drop-bottom container

Bin 009 — Stackable hairpin containers with skid base

Bin 010 — Corrugated steel controlled-flow box and stand

Bin 012 — Corrugated steel container, general use

Bin 014 — Self-dumping hopper operates by gravity

Bin 015 — Drop bottom container on skid base

Bin 016 — Corrugated steel foundry tub w/ lifting eyes

Bin 017 — Corrugated steel controlled-flow container

Bin 018 — Corrugated steel container w/ hinged side

Bin 020 — Controlled-flow containers on workstation

Bin 022 — Hot parts container

Bin 023 — Corrugated containers w/ unique feet and lids

Bin 024 — Knockdown containers for automaker

Bin 025 — Standard high-strength hairpin container

Bin 026 — HD Stackable wire mesh container

Bin 028 — Stackable corrugated steel container

Bin 029 — Corrugated stacking skid box

Bin 030 — Containers with steel base/ side frames and tri-wall sides for use in AS/RS

Bin 031 — All aluminum bulk-handling container

Bin 032 — Leak-proof stainless steel container

Bin 033 — Stacking bins for automobile steering component manufacturer

Bin 034 — Special-use corrugated steel container

Bin 035 — Stainless steel parts handling/washing basket

Bin 036 — Corrugated steel container w/ casters

Bin 037 — Corrugated steel container w/ casters and rolover trunnion

Bin 038 — Hopper-front corrugated steel container

Bin 039 — Drop-bottom corrugated steel container

Bin 040 — Stackable corrugated container w/ special tiering legs

Bin 041 — Controlled-flow container (door closed)

Bin 042 — Stackable corrugated steel parts container w/ skid base

Bin 044 — Heavy-duty drop bottom box for aluminum company

Bin 045 — Stackable basket with casters and tow bar

Bin 046 — Heat-treating container, coated w/ high temperature aluminum paint

Bin 049 — Wire container w/ caster and conveyor runners

Bin 050 — Large corrugated containers w/ rollover fork channels

Bin 051 — Corrugated container w/ skid base, lift eyes, end door

Bin 053 — Corrugated container with special skid base

Bin 054 — Storage bin with hinged lid

Bin 058 — Floating bottom container holds trays of auto parts

Racks

Custom designed to be stackable, fold-down, with or without casters, and with the proper dunnage to hold your products safely and securely, we'll build racks for virtually any product from engines to castings to car doors to tires.

Rack 002 — Stacking rack with casters for handling rolled materials

Rack 003 — Handling cart with steel grid base

Rack 004 — Universal steel stacking rack with fold-down frames

Rack 005 — Stacking/Handling rack for car doors

Rack 007 — Stacking rack with casters

Rack 008 — Coil cradle built for aluminum producer

Rack 009 — Open-end tiering rack, hairpin design

Rack 010 — Prong truck for handling uncured rubber tires

Rack 011 — Open-end hairpin tiering rack

Rack 012 — Cradle rack for handling rolled materials

Rack 014 — Steel rack for work-in-process storage

Rack 015 — Fold-down stacking rack built with various dunnage

Rack 016 — Prong rack for tires in various production stages

Rack 018 — Specialty rack for handling washing machine drums

Rack 019 — Specialty rack for steel reels

Rack 020 — Bar storage racks

Rack 021 — General purpose cast-er cart

Rack 025 — Rack with spring-loaded shelves

Rack 026 — Large cart for farm equipment

Rack 030 — Engine rack with quick-release lock

Rack 032 — Shipping rack for rear suspension auto parts

Rack 033 — Trim molding rack for auto industry

Reels & Spools

For wire, fabric, plastic tubing, or whatever material you produce, we'll build reels from sixteen inch up to six feet diameter and anywhere in between, along with bases and cradles.

Reel 001 — Specialty spool for wire applications

Reel 002 — 30" corrugated spool made of 1/4" steel/machined hubs

Reel 003 — Reel with heat-treated sides and chemical resistant epoxy paint

Reel 004 — 49" reel for handling fabric

Reel 005 — Specialty steel spool for wire industry

Reel 006 — 1500mm and 700mm HD steel spools

Reel 008 — Large 6' spool for holding plastic hose

Pallets & Skids

For virtually any application that requires the toughness of metal, with many designed to be stackable and accessible by forklift from either side.

Pallet 001 — Double-faced aluminum pallet

Pallet 002 — Corrugated steel pallet w/ 4-way forklift entry

Pallet 003 — Aluminum pallet built for handling currency

Pallet 004 — Double-faced slate pallet

Pallet 005 — Fabric roll cradle for textile industry

Pallet 006 — Corrugated steel double-faced pallet

Pallet 007 — Heavy-duty double-faced steel pallet

Pallet 008 — Steel grating cooling pallet for foundry application

Pallet 009 — Corrugated steel slip sheet

Pallet 015 — Multi-function pin pallet accepts an assortment of parts

Pallet 010 — Single-faced universal pallet

Pallet 016 — Large pin-pallet with runners for forklift loading of parts
